Congress

## GREENPORT CONGRESS 2018 – THE OPPORTUNITY

Now in its 12th year, GreenPort Congress provides Senior Executives with a meeting place to discuss and share the latest in sustainable development and environmental practice within sea ports, terminals and their associated logistics supply chain. It is a must-attend event for environmental managers and planners, harbor masters, logistics managers, energy managers, sustainability and corporate social responsibility executives from ports, terminal operators, shipping lines, shippers and logistics companies.

Baltimore was chosen as the ideal partner for the first US edition as it has a multifaceted sea port with terminals dealing with automobiles, containers, farm and construction equipment, forest products, breakbulk cargo and cruise passengers.

The Port was recently named one of the fastest-growing ports in North America by the Journal of Commerce following its recognition as the most efficient container port in the USA and is central to economic activity on the east coast. The Port of Baltimore combines its enviable growth with a strong commitment to meeting its obligations for improved air and water quality and ensuring protection for the environment whilst building international business.

GreenPort Congress provides an exceptional platform for your company to market itself through one of our varied sponsorship packages. It brings all the benefits of your brand being associated with premium content in a face-to-face thought leadership environment.
